

PRIVATE PARTICIPATION CONCRETE REPLACEMENT PROGRAM (PPCRP)

PROGRAM APPLICATION INSTRUCTIONS for 2009

Dear Property Owner:

Thank you for your interest in the Private Participation Concrete Replacement Program offered by the Village of Elk Grove Village. The PPCRP program allows residents to replace their driveway apron, which includes adjacent sidewalk, and abutting curb and sidewalk within the public right-of-way.

Driveways, walkways, patios and other concrete work located on private property are not included in the program however; the property owner may contract for additional work directly with the Village's contractor. This additional work would require a separate permit from the Engineering Department.

The following steps should be followed to participate in the program.

- Step 1:** The property owner must complete the enclosed **Program Application Form** and return it to the Public Works Department, located at 666 Landmeier Road, as soon as possible, but **no later than, May 1, 2009**. Completion of an application is not an obligation to participate in the Program.
- Step 2:** The Village will visit your property, measure the requested work, and calculate a cost based on contract unit bid prices received from the contractor.
- Step 3:** The Village will invoice the property owner for the cost of the requested concrete work. A driveway permit application will be included for your use and the \$25.00 permit fee will be added to your invoice.
- Step 4:** If you wish to proceed with the work and are satisfied with the cost estimate, please submit full payment and the completed driveway permit application to the Village Finance Department at 901 Wellington Avenue. **Payment must be received no later than June 5, 2009.**
- Step 5:** Upon receipt of payment, driveway work will be scheduled to take place June through August 2009. You will be notified prior to the start of work in your area. Construction scheduling is weather dependent and special date requests cannot be accommodated. Cancellation of work will not be accepted and payment is non-refundable.

The role of the Village is to serve as an intermediary between you and the contractor. **There are no contractor or Village warranties under this Program.** However, as with all other work

done within the Village, the work performed and the materials used by the contractor will be inspected by Village personnel to insure compliance with Village codes and material standards.

Should you have any questions about the Program, please call the Public Works Department at (847) 734-8800, Monday through Friday, 8:30 A.M. to 4:30 P.M.

PRIVATE PARTICIPATION CONCRETE REPLACEMENT PROGRAM (PPCRP)

FREQUENTLY ASKED QUESTIONS

Can I replace only my curb to eliminate the 'bump' at the end of my driveway?

Typically, construction of a new depressed curb along the entire length of the driveway and replacement of the driveway apron is required to eliminate the 'bump' at the end of the driveway.

Will the Village pay 50 percent of the concrete work?

No, the property owner is responsible for 100 percent of the cost of the requested work. The Village oversees the administration and material testing for the concrete work.

What is the cost for the concrete work?

The Village will measure the requested work and provide you with a cost estimate based on contract unit bid prices. The following information is provided as a general guide for expected replacement costs.

Estimated Concrete Replacement Costs

Item	Unit	Unit Cost	Driveway (W)	Driveway (W)	Driveway (W)	Driveway (W)
			12 ft.	18 ft.	12 ft.	18 ft.
			Apron (L)	Apron (L)	Apron (L)	Apron (L)
			16 ft.	16 ft.	11 ft.	11 ft.
Driveway Apron	Sq.Yd.	\$37.00	\$930	\$1,320	\$640	\$910
Curb	Ln.Ft.	\$13.00	\$240	\$320	\$240	\$320
Sidewalk	Sq.Ft.	\$ 4.00	\$80 per 4' x 5' square		\$100 per 5' X 5' square	

Can my driveway apron have a decorative finish?

No, driveway aprons constructed under this program must be concrete with no special finishes.

Can I widen my driveway apron width?

Generally, driveway aprons must match the width of the existing driveway and may not exceed 20 feet. If you wish to vary from this policy you would need to obtain the necessary approvals from the Engineering Department prior to submittal of the application.

I would like my driveway completed prior to a specific date?

The contractor has established unit prices based on completing driveways within one section of the Village at a time. This provides for a more efficient operation and results in lower contract unit costs. Therefore, **it is not feasible to honor specific time requests for concrete work** . The contractor will schedule work to take place June through August. You will be notified prior to the start of work in your area. **Please note that once payment has been received cancellations will not be accepted.**

Will the contractor replace my driveway on private property?

Typically, the contractor will be willing to contract directly with the property owner for additional concrete work on private property including driveways, walkways and/or patios. Accepting the additional work is at the contractor's option, and the contract unit costs shown above may not apply. The Public Works Department will not oversee any work on private property. Property owners must obtain a separate permit from the Engineering Department for the additional work.
